Art Unit 337

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-21 are, drawn to an inhalation device, classified in Class 128, subclass 203.15.

II. Claims 22-26 are, drawn to an elongate strip of medicament hermetically sealed between two sheets, classified in Class 206, subclass 484.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a means for packaging pills or as a means for packaging microelectronic devices. See M.P.E.P. § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II restriction for examination purposes as indicated is proper.
